

project proposal

diameter about 270 - 330cm  
height about 330cm  
Place some cylindrical bags

Projector installed on the ceiling

Milky white top sheet (with the bag inflated)

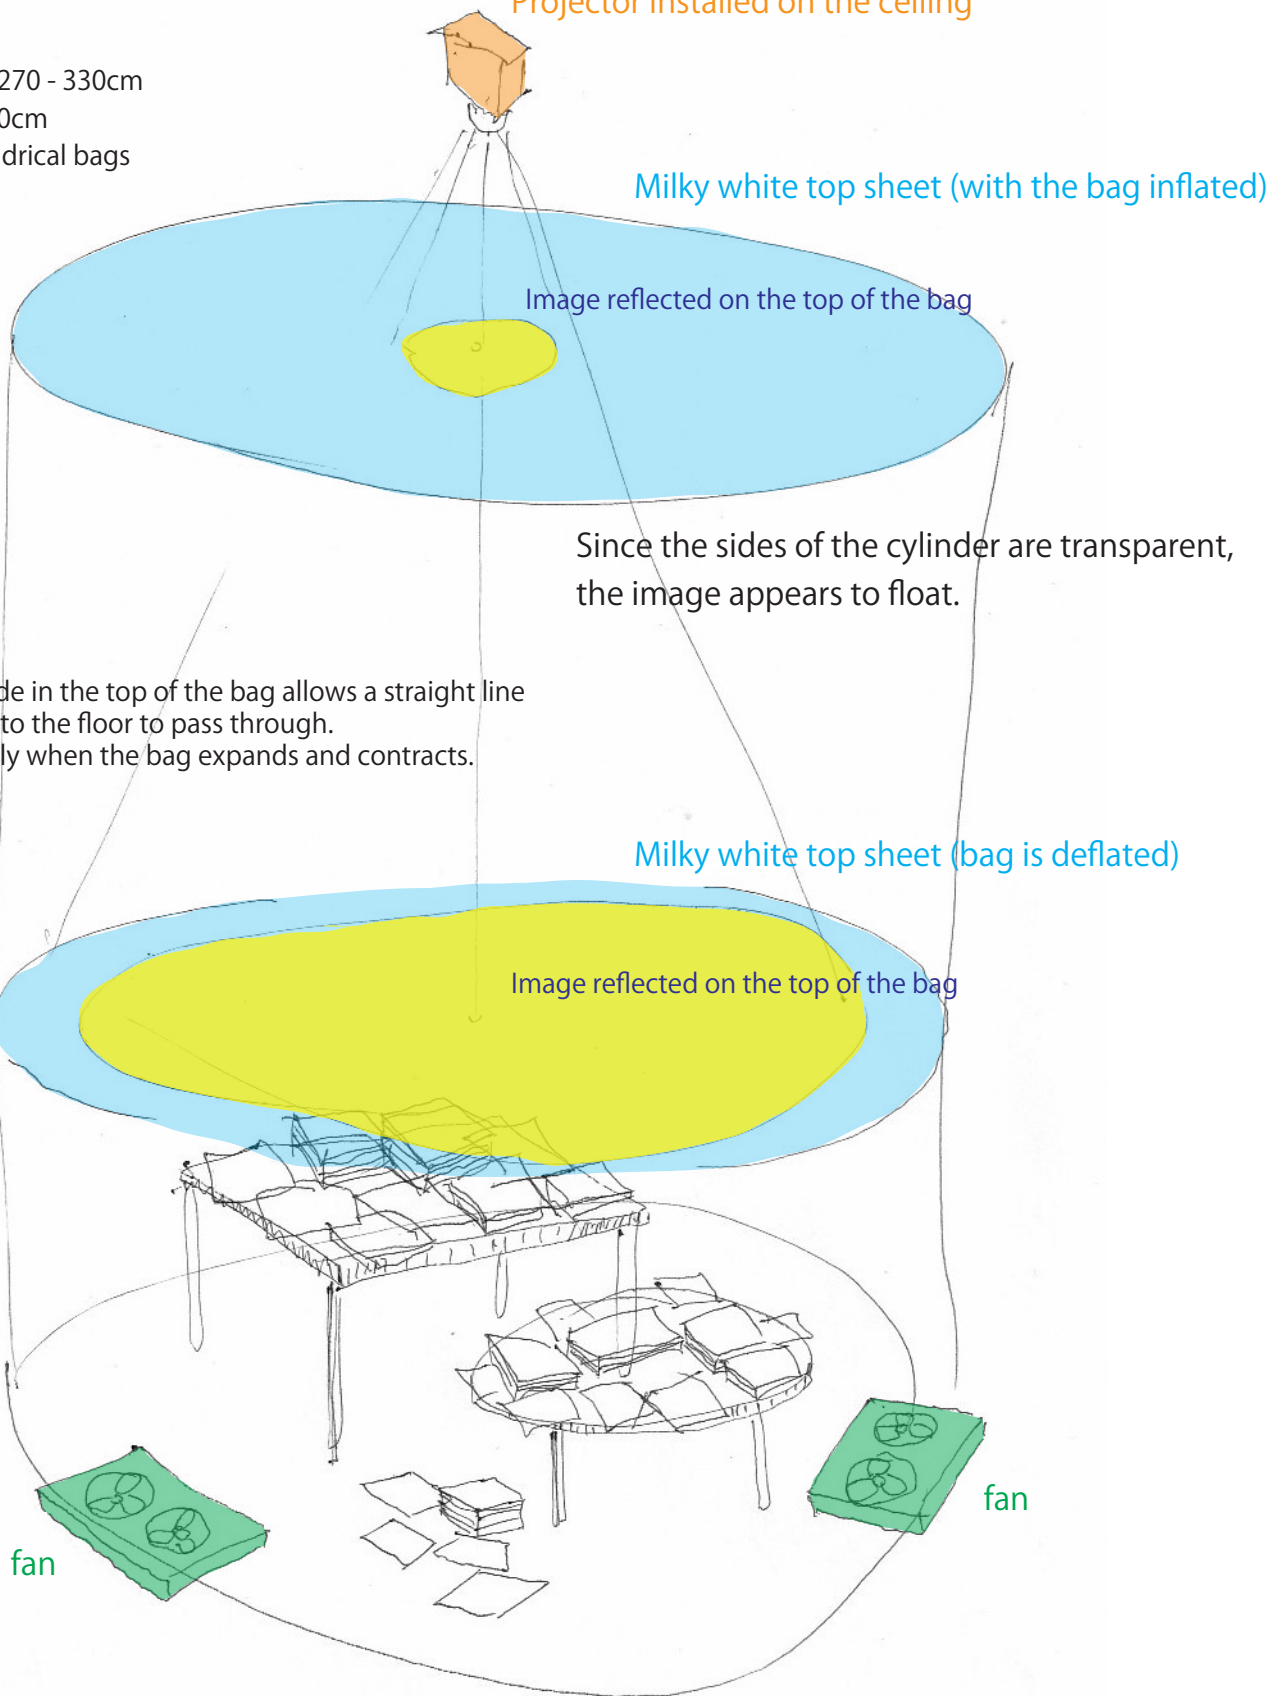

Image reflected on the top of the bag

Since the sides of the cylinder are transparent, the image appears to float.

A small hole made in the top of the bag allows a straight line from the ceiling to the floor to pass through. It moves vertically when the bag expands and contracts.

Milky white top sheet (bag is deflated)

Image reflected on the top of the bag

Objects such as white tables and chairs, bundles of paper, and tableware are placed in the bag.
